Re: MSRB Notice 2004-43 Relating to Performance Data in Advertisements For Municipal Fund Securities

Dear Mr. Lanza:

The Investment Company Institute¹ appreciates the opportunity to express support for the Municipal Securities Rulemaking Board's proposed amendments to Rule G-21, relating to advertisements.² In particular, the MSRB Notice proposes to require that advertisements for municipal fund securities that show performance data include a phone number or website where an investor may obtain more current performance information. The proposal is consistent with the Institute's September 2004 comments on related proposed amendments to Rule G-21.³

Facilitating access to more current performance information will benefit investors, thereby better protecting them from reliance upon stale performance information. It will also increase uniformity between the MSRB's advertising requirements and those imposed on mutual funds.⁴ Uniformity is appropriate because municipal fund securities and mutual funds share many common features, including the manner in which they are advertised to investors. Subjecting these investment products to similar regulatory standards reduces both potential investor confusion and the burdens of conflicting regulatory requirements for persons that offer and sell both types of securities. In addition, because the NASD is charged with inspecting securities firms for compliance with both MSRB and SEC advertising rules, uniform standards also will facilitate the NASD's ability to conduct such inspections. For these

reasons, we strongly support adoption of the MSRB's current proposal.

Compliance Date

Should the MSRB adopt the proposed amendments, we strongly recommend that it coordinate the compliance date with the compliance date for the related advertising rule amendments that the MSRB recently filed with the Securities and Exchange Commission.⁵ Taken together, these proposals will require changes to the contents of advertisements, to a dealer's operational systems to obtain and disseminate the updated performance information, and to a dealer's website or telephone system to provide such updated information. Such coordination will avoid the need for a two-step implementation process, which would only serve to increase a municipal securities dealer's compliance burdens and costs without enhancing investor protection.
